

**NAVTEQ Webinar: Land Base Management Featuring Tier 3
September 17, 2008
3:00 pm – 3:45 pm CST**

Spatial inaccuracies in your GIS data can severely limit how and when GIS applications can be used across the enterprise, thereby diminishing the value and return on these technology investments. Join us for a webinar to learn how to implement an enterprise land base and how Tier 3 can keep the changes made by your organization and NAVTEQ synchronized.

Tier 3, Inc. is dedicated to managing the accuracy of your spatial data assets and keeping your data current by implementing a lifecycle approach to land base management. They also specialize in resolving spatial accuracy issues and efficiently managing change through the use of Tier 3 gConflate and gMaintenance solutions.

NAVTEQ provides accurate and comprehensive map data and updates to keep your map data fresh and your GIS applications viable.

You can realize tangible benefits because with NAVTEQ data and Tier 3 solutions it is possible to deploy sophisticated, integrated applications with higher levels of spatial accuracy and currency.

Use the following information to join the webinar:
